Mood Disorder Questionnaire (MDQ)

Name: Date:		
Instructions: Check (\mathscr{O}) the answer that best applies to you. Please answer each question as best you can.	Yes	No
1. Has there ever been a period of time when you were not your usual self and		
you felt so good or so hyper that other people thought you were not your normal self or you were so hyper that you got into trouble?	\bigcirc	\bigcirc
you were so irritable that you shouted at people or started fights or arguments?	\bigcirc	\bigcirc
you felt much more self-confident than usual?	\bigcirc	\bigcirc
you got much less sleep than usual and found you didn't really miss it?	\bigcirc	\bigcirc
you were much more talkative or spoke faster than usual?	\bigcirc	\bigcirc
thoughts raced through your head or you couldn't slow your mind down?	\bigcirc	\bigcirc
you were so easily distracted by things around you that you had trouble concentrating or staying on track?	\bigcirc	\bigcirc
you had much more energy than usual?	\bigcirc	\bigcirc
you were much more active or did many more things than usual?	\bigcirc	\bigcirc
you were much more social or outgoing than usual, for example, you telephoned friends in the middle of the night?	\bigcirc	\bigcirc
you were much more interested in sex than usual?	\bigcirc	\bigcirc
you did things that were unusual for you or that other people might have thought were excessive, foolish, or risky?	\bigcirc	\bigcirc
spending money got you or your family in trouble?	\bigcirc	\bigcirc
2. If you checked YES to more than one of the above, have several of these ever happened during the same period of time? <i>Please check 1 response only.</i>	\bigcirc	\bigcirc
3. How much of a problem did any of these cause you — like being able to work; having family, money, or legal troubles; getting into arguments or fights? <i>Please check 1 response only.</i>		
No problem Minor problem Moderate problem Serious problem		
4. Have any of your blood relatives (ie, children, siblings, parents, grandparents, aunts, uncles) had manic-depressive illness or bipolar disorder?	\bigcirc	\bigcirc
5. Has a health professional ever told you that you have manic-depressive illness or bipolar disorder?	\bigcirc	\bigcirc

This questionnaire should be used as a starting point. It is not a substitute for a full medical evaluation. Bipolar disorder is a complex illness, and **an accurate, thorough diagnosis can only be made through a personal evaluation by your doctor.**

Adapted from Hirschfeld R, Williams J, Spitzer RL, et al. Development and validation of a screening instrument for bipolar spectrum disorder: the Mood Disorder Questionnaire. *Am J Psychiatry.* 2000;157:1873-1875.

This instrument is designed for screening purposes only and is not to be used as a diagnostic tool.

How to Use

The questionnaire takes less than 5 minutes to complete. Patients simply check the yes or no boxes in response to the questions. The last question pertains to the patient's level of functional impairment. The physician, nurse, or medical staff assistant then scores the completed questionnaire.

How to Score

Further medical assessment for bipolar disorder is clearly warranted if patient:

• Answers *Yes* to 7 or more of the events in question #1

AND

- Answers Yes to question #2
 AND
- Answers *Moderate problem* or *Serious problem* to question #3
